REYMARC F. ALMADEN

AI Automation Builder | n8n / Make / Zapier / GoHighLevel | Healthcare Records & Customer Operations
reymarcalmaden704@gmail.com | Cebu City, Philippines | reymarc-portfolio.vercel.app | linkedin.com/in/rey-automations | github.com/ralmaden-ai

PROFESSIONAL SUMMARY

Detail-oriented professional with 4+ years in HIPAA-compliant medical records retrieval and high-volume customer operations, now building a parallel track in AI automation. Designs end-to-end workflows in n8n, Make, Zapier and GoHighLevel, including voice AI receptionists, CRM pipelines, appointment reminders and AI-assisted lead follow-up, with a habit of verifying real outputs rather than trusting that each step ran.

TECHNICAL SKILLS

Automation & AI: n8n, Make, Zapier, GoHighLevel (GHL), VAPI voice agents, Groq, Google Gemini, Airtable, Google Sheets / Gmail / Calendar APIs, Serper.dev, webhooks and REST APIs, RAG workflows

Healthcare & Compliance: Medical Records Retrieval, Risk Adjustment & Patient Accuracy, HIPAA Compliance, Provider & Facility Verification, ChartSwap, MRO, Verisma

Operations: CRM & Case Management, Pipelines & Opportunities, Shipment Tracking, Data Validation, Process Documentation, Attention to Detail, Independent Work, Systems Thinking

PROFESSIONAL EXPERIENCE

Chart Retrieval Representative | Cotiviti Inc.
Cebu Business Park, Philippines | 2024 – 2026

- Requested complete medical records from hospitals and physician practices in support of Risk Adjustment and Patient Accuracy programs for Medicare and Commercial health plans, including Aetna and Anthem.
- Verified provider affiliations and facility details before each request, cutting misdirected and rejected retrievals; submitted and tracked requests through ChartSwap, MRO and Verisma with accurate logs and completion dates.
- Reviewed retrieved records against patient identifiers for completeness, followed up on outstanding requests, and held strict HIPAA confidentiality across a high volume of concurrent open cases.

Customer Service Associate | Amazon Operations Services Philippines, Inc.
Cebu Business Park, Philippines | 2022 – 2024

- Handled high-volume Amazon Prime inquiries across phone, chat and email in a metrics-driven environment; cross-trained in Prime Video and Fire TV technical support.
- Tracked shipments across the fulfilment cycle, flagging delays before they became complaints, and resolved delayed, lost and misrouted orders through structured escalation within service-level targets.
- Logged cases and processed refunds and replacements in CRM and internal tracking tools while sustaining high customer satisfaction scores.

AUTOMATION & AI PROJECTS

Self-initiated portfolio builds on synthetic data. Full case studies at reymarc-portfolio.vercel.app.

Urgent Care Voice Receptionist for Call Routing *n8n · VAPI · Groq · Google Sheets · GoHighLevel*

- Voice assistant that works out which department a caller needs, transfers only when it is open, and files callbacks as owned CRM tasks. Routing logic lives in n8n, not the prompt, and every decision is logged to an audit sheet. Verified on browser test calls across three departments.

Voice Receptionist for Service Bookings *n8n · VAPI · Google Calendar · Google Sheets · Telegram*

- Single 44-node workflow behind a voice agent for a trades business: books into genuinely free two-hour windows (re-checking before writing), cancels by reference number, escalates emergencies, logs every call. All four tools verified end to end on web calls.

Medical Records Retrieval Automation *n8n · Groq · Airtable · Webhooks*

- Seven workflows from intake to completion, coordinated through shared Airtable state with a human gate at each real decision and AI limited to match scoring and reply classification. Tested end to end with an unbroken per-case audit trail; informed by the Cotiviti role.

Automation Hub for Business Operations *n8n · Groq · Google Sheets · Gmail · Serper.dev*

- Five scheduled modules (weekly operations report, lead and invoice follow-up, project tracking, research digest) sharing one read / filter / draft / send / mark-row pattern, so nothing is chased twice.

Also: GoHighLevel builds for a fitness booking funnel (confirmation plus 24 / 12 / 4-hour reminders with cancellation checks), a real estate lead-routing CRM (buyer / seller / both pipelines with agent alerts), a Messenger FAQ assistant grounded in a Google Doc, and an n8n lead follow-up sequence with reply detection.

TRAINING & EDUCATION

n8n, Make.com, Zapier — Technical Virtual Assistants PH, 2026
HighLevel CRM, Prompt Engineering — Tara AI Community+, 2026
Technical Vocational Livelihood – Information Communication Technology — University of San Jose Recoletos, 2017 – 2019
